MongoDB - Express.js - jQuery - Bootstrap - Handlebars
HTML5 - SASS/CSS - AJAX - postgreSQL - Git/Github

Full-stack web developer who loves building apps with purpose.

Experience

General Assembly
Web Development Immersive

October 2017 – January 2018 *Boston, MA*

- Completed a 12-week intensive full-stack web development program requiring 50+ hours of work a week.
- Built four full-stack web applications with 3-4 day deadlines.
- Used front end frameworks like Ember.js and jQuery to create user-friendly, interactive, single-page applications.
- Used Rails and Node to build authenticated RESTful API's.
- Developed strong programming fundamentals, documentation practices and workflow management in team settings.

Recent Projects

- **Nozama** – eCommerce site built with Node, Express, and MongoDB using the Stripe checkout API.
- **SpokeRetriever** – Bicycle registration site built with Rails and JS.
- **Weather Now** – Current weather around the world app built using the Open Weather, IPAPI and Google Maps API's.

Free Code Camp
Front-End Development Certification
